

Picky-Eater 30-Day Dinner Rotation Blueprint

30 Days of Kid-Approved, Nutrient-Dense Indian Dinner Plans That Eliminate Dinner Struggles

Introduction: Why Dinners Are Hard

At the end of the day, children are tired, sensory sensitivity is high, and parental patience is low. This blueprint provides a 30-day rotation system that balances comfort food textures with dense pediatric nutrition.

The Golden Strategy:

- 1. **Shared Ingredients:** Dinners utilize prep that can easily feed parents too (see the Family Health Blueprint for the parent's conversion).
- 2. **Texture Blending:** Pureeing vegetables into sauces (creamy paneer makhani, dal tadkas) avoids visual triggers.
- 3. **Low-Stress Presentation:** Small portion sizes with a "comfort component" on the plate.
